MYOUKEE:

Revolutionizing karaoke production

The world’s best product that allows you to create a karaoke experience from any song, in any language, in real time, without relying on an existing database.

MYOUKEE

Any song you love, now available for karaoke.

Presented by: Zeev Weinrich | 11/25

Limited databases dominate the karaoke market

The main problem: The global karaoke market, a social and global entertainment platform with enormous potential, is currently limited by its exclusive reliance on existing and limited song databases

Lack of timeliness

Users cannot sing new songs or recent hits that have not yet been released as karaoke.

Lack of flexibility and choice

Users are bound by the content and presentation style chosen for them by the platform and do not experience true personalization.

Limited creativity

It is not possible to sing lesser-known songs, niche songs, or original compositions.

High business investment

Businesses are forced to invest heavily in purchasing expensive content updates and maintaining traditional equipment.

There is a critical market need for a groundbreaking technological solution that offers immediacy, complete user control, and endless customization.

Our Solution

MYOUKEE: The technology that turns any song into karaoke.

The innovative solution: MYOUKEE is a groundbreaking platform that uses advanced AI to separate vocal tracks and generate personalized karaoke songs from any song in the world – in real time.

How does it work? (In 3 simple steps):

01

Select a song

Upload an audio file (MP3, MP4, WAV) or paste a direct link from YouTube.

02

Customize

Choose a visual background for your karaoke video and the language for accurate transcription.

03

Click and get a karaoke

Our algorithm instantly processes the song and produces a complete karaoke experience, ready to sing and share.

The result: An endless karaoke library, fully controlled by the user, independent of existing databases.

Technological core: Groundbreaking AI

Our unique selling point:

We do not rely on existing karaoke video databases. We *create* your karaoke for you.

Source Separation

Unique AI technology that accurately separates the vocal channel from the playback (melody and instruments).

Result: Clean, high-quality playback for singing.

Automatic transcription and synchronization

Automatic transcription of lyrics and precise synchronization with the music.

Intuitive user interface that allows for quick and easy error correction for perfect results
(a critical feature for content in many languages).

The result for investors:

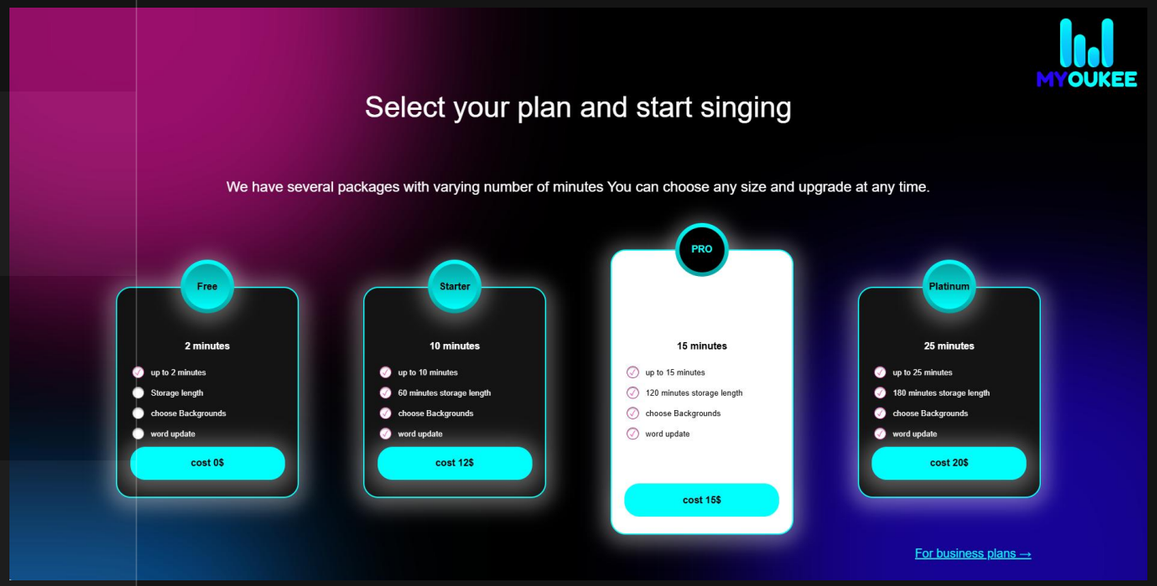
- A significant technological advantage that is difficult to replicate.
- Complete flexibility to handle any new or old song on the global music market, without relying on expensive content licenses.

Revenue model: Freemium & plans for private users (B2C)

We operate on a flexible Freemium model, which allows for a basic free experience and encourages upgrading to a premium subscription through a clear value proposition.

Plan Structure:

Plan	Song Minutes	Accuracy	Server Storage	Cost
Free	3 minutes (one minute per song)	Not included	No storage	$0
Basic	10 minutes	included	60 minutes	$12
Regular	15 minutes	included	120 minutes	$15
Pro	25 minutes	included	180 minutes	$20



Revenue model: Business plans and partners (B2B)

In addition to private users, we have developed a dedicated business model that serves businesses such as karaoke rooms, clubs, and event producers, providing them with a unique and effective solution that has no competitors in the market.

Business plan structure:

Business plan	Song minutes	Accuracy	Server storage	Cost
Business 1	50 minutes	Included	3 days	$30
Business 2	100 minutes	Included	Week	$50
Business 3	400 minutes	Included	Week	$120

Future developments:

- Addition of the option to animate a user's image as the background for a video
- A mobile app
- Targeted advertising model within the app for free users

A growing global entertainment market, a unique technological opportunity.

Market size and growth:

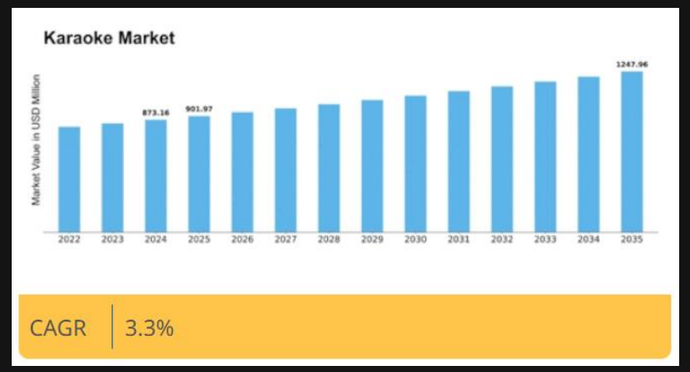
We operate in a market with significant growth potential:

$901.9 million
Karaoke market value
In 2025

$1.25 billion
Forecast for 2035
Significant growth in the global market

3.3%
CARG
Average annual growth rate

Data source:
(Market Research Future, 2025)



Target audience:

- Millions of karaoke enthusiasts around the world (B2C).
- Amateur musicians and content creators looking for playbacks and automatic transcription.
- Businesses (B2B) such as karaoke rooms and clubs looking for a cost-effective alternative to traditional karaoke systems, combining technological flexibility with an endless song database.

Technological advantage: MYOUKEE's unique technology, which automatically generates karaoke files, solves the main limitation of competitors (who depend on limited databases) and allows us to capture a significant share of this growing market.

Where are we now and to where are we headed?

Current achievements:

We are in the advanced stages of launching our karaoke software:

Product ready

The core development of the software has been completed (Web Application) and carefully designed with an emphasis on an intuitive user interface.

Technical readiness

We are currently working on final QA testing and initial cloud deployment.

Built-in global support

The software already supports interfaces and songs in over 100 languages, enabling immediate global penetration.

Future milestones:

With the capital we raise, we will achieve the following goals in the next 12-18 months:

1

Q1-Q2: Full global launch and monetization:

- Official launch of the software to the general public (Soft Launch).
- Launch of a targeted marketing campaign in key target markets.
- Reach 7K monthly active users (KPI: X MAU).

2

Q3-Q4: Optimization & Expansion:

- Improve user retention rate based on data analysis.
- Add advanced features.
- Develop a mobile app.

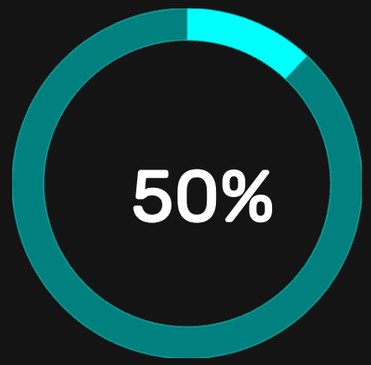
Required investment and distribution of funds

The request:

We are currently raising a seed round of **$1m** in exchange for **20% of the company's shares**.

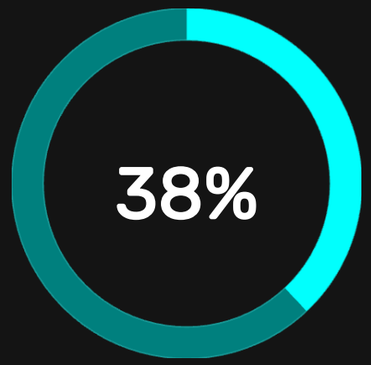
Use of funds (percentage distribution):

The funds we raise will be invested in areas critical to accelerating the software's growth and expansion:



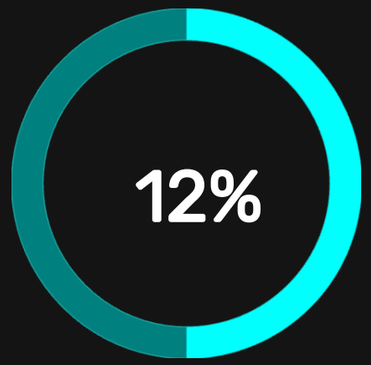
Marketing and User Acquisition

Targeted digital marketing: managing sponsored campaigns and optimization on key platforms (Google Ads, Meta).
Investment in search engine optimization (SEO) to attract users to the site.



Product & Engineering

Maintenance and development: improving the existing product, developing new features, and maintaining systems.
Core team and infrastructure: operating costs of the development environment.



Infrastructure & Cloud

Data storage in the cloud.
Using GPU resources to speed up real-time karaoke creation.

MYOUKEE

MYOUKEE: Turn any song in the world into a karaoke experience

We invite you to join us in leveraging our unique technology, which automatically generates karaoke files, thereby solving the problem of limited databases on the market.

Our technological advantage, combined with support for over 100 languages, positions us as the global leader in the digital karaoke market.

Watch the live demo

We would be happy to explore opportunities for strategic collaboration.
